Enterprise Software Agreements Listed Below

The Enterprise Software Initiative (ESI) is a Department of Defense (DoD) initiative to streamline the acquisition process and provide best-priced, standards-compliant information technology (IT). The ESI is a business discipline used to coordinate multiple IT investments and leverage the buying power of the government for commercial IT products and services. By consolidating IT requirements and negotiating Enterprise Agreements with software vendors, the DoD realizes significant Total Cost of Ownership (TCO) savings in IT acquisition and maintenance. The goal is to develop and implement a process to identify, acquire, distribute, and manage IT from the enterprise level.

In September 2001, the ESI was approved as a "quick hit" initiative under the DoD Business Initiative Council (BIC). Under the BIC, the ESI will become the benchmark acquisition strategy for the licensing of commercial software and will extend a Software Asset Management Framework across the DoD. Additionally, the DAR Council has approved a final rule which will incorporate the ESI into the Defense Federal Acquisition Regulation Supplement (DFARS) Section 208.74.

Authorized ESI users include all Defense components, U.S. Coast Guard, Intelligence Community, and Defense contractors when authorized by their contracting officer. For more information on the ESI or to obtain product information, visit the ESI Web site at <http://www.don-imit.navy.mil/esi>.

**The U.S. Army Small Computer Program
(ASCP) Maxi-Mini
and Database (MMAD) Program
Listed Below**

The Maxi-Mini And Database (MMAD) Program is supported by two fully competed Indefinite Delivery/Indefinite Quantity (ID/IQ) contracts with IBM Global Services and GTSI Corporation. The MMAD Program is intended to be DoD's follow-on to the Navy administered Supermini Program in fulfilling high and medium level IT product and service requirements. Like its predecessor, MMAD provides items to modernize, upgrade, refresh and consolidate current systems, as well as to establish new ones.

Products include:

64-bit Servers (RISC and Itanium): HP, IBM, Compaq
64-bit RISC and NT Workstations: HP, Compaq
Routers/Network: Cisco, 3COM
Storage Systems: IBM, RMSI, Compaq, Dot Hill, System Upgrade, EMC

Ancillaries include network hardware items, upgrades, peripherals and software.

Services are geared toward providing solutions needed to effectively manage and support the complexities of agency or program system environments, to include: consultants, analysts, engineers, programmers, trainers and administrators.

MMAD is designed to ensure the latest products and services are available in a flexible manner to meet the various requirements identified by DoD and other agencies. This flexibility includes special solution CLINs, technology insertion provisions, ODC (Other Direct Cost) provisions for ordering related non-contract items, and no dollar/ratio limitation for ordering services and hardware.

Latest product additions include EMC and McData storage solutions, and Tivoli Storage Manager software. Both IBM and GTSI now provide HP, Cisco and EMC products and services with MMAD terms and conditions.

Awarded to:

GTSI Corporation (DAAB07-00-D-H251); (800) 999-GTSI

IBM Global Services-Federal (DAAB07-00-D-H252); CONUS:

The U.S. Army Enterprise Software Initiative BPA DAAB15-99-A-1002

As of February, 28, 2002, the Navy holds inventory of Oracle Database Enterprise Edition (9i and 9ias) perpetual licenses (either named-user, multi-server or processor), and additional options and tools (i.e., security options, partitioning, spatial, clustering, diagnostics management packs, Tuning Management Pack, Change Management Pack, Internet Application Server Enterprise, Internet Developer Suite, and Balanced Scorecard). Initial orders will include a warranty period of March 1 through May 31, 2002, and software support for the period June 1 through May 31, 2003. Placing orders early will result in the best deal for end users. Four (4) additional out years of Silver Technical Support and product update support have also been negotiated.

The initial purchase price for end users is an average of a 64 percent discount off GSA prices and total package discounts (including out year technical support) average a 70 percent discount off GSA prices. Customers with small requirements can benefit from discounts normally reserved for customers with orders over \$10 million. These licenses can be distributed throughout the Navy. In accordance with the Federal Acquisition Regulations (FAR) and DoD policy, Navy customers who have selected Oracle to satisfy new requirements must purchase the "new" Oracle licenses from the inventory.

This virtual inventory was established through the Department of the Navy Chief Information Officer (DON CIO) Enterprise Licensing Team and the Department of Defense Enterprise Software Initiative (DoD ESI). The DoD ESI is a joint initiative, which has been approved by the DoD Business Initiative Council (BIC).

This inventory will be managed by the Department of the Navy Information Technology (DON IT) Umbrella Program Office at Space and Naval Warfare Systems Center, San Diego.
